## ★ EXPERIENCES

### Develop M-System web application

January 2017 — January 2019

An enterprise system built to help us control all of company business: ordering, planning, purchasing, production, inventory, quality, delivery, costing, profit, finance. Garment ERP system is an internal product of Motives.

Technologies: .NET Core, ASP.NET MVC, ASP.NET Web API, Entity Framework, HTML5, CSS3, Bootstrap, JQuery, DevExtreme UI Widget, VS 2017, SQL 2017, Quickbook connection

### Develop MSoft windows application

January 2017 — January 2019

An enterprise system built to help us control all of company business: ordering, planning, purchasing, production, inventory, quality, delivery, costing, profit, finance. Garment ERP system is an internal product of Motives.

Technologies: VS 2015, MSSQL 2014, NET Framework 4.5, DevExpress, Quickbook connection

### Develop MSystem Mobile application

January 2017 — January 2019

Technologies: Ionic framework, Angular, .NET Core

### Develop Homeroom application

May 2020 — August 2020

An original timetable app with a chime for children spending time at home. For dads and moms who are worried that their children will spend a day lazily due to self-restraint in nursery schools and kindergartens and elementary school closures, we will create a timetable where children can spend their home life meaningfully and create an environment where children can learn, move and play voluntarily.

Technologies: React Native, Typescript, PHP, Lumen, MySQL, Docker, AWS (EC2, S3, ELB), WordPress

### Maintain and rewrite Busjehuren

March 2020 — Present

Online booking is super easy and our service is rated best on Trustpilot in the Car Rental category.

- Directly communicate with client to get requirements
- Maintain and ensure the application working continuously
- Rewrite the application in another technology stack and deploy in GCP

Technologies: Nodejs, Firebase, Angular, Typescript, RxJS, Google Cloud Platform (Cloud Functions, Cloud Storage, Dialogflow)
